

Quasar

Native Cloud file-based QC solution

Quasar is industry's first native cloud based QC solution available as 'SaaS' or installed in 'Virtual Private Cloud'. It is a perfect fit for workflows using content ingest, transcode and delivery on the cloud.

Designed to meet the requirements of OTT and Content Providers, Quasar comes with flexible, usage based monthly plans.

Quasar combines the power of Pulsar QC with worldwide reach and compelling economics of Cloud infrastructure. With "Quasar SaaS" option you can focus on delivering pristine content to your customers while we manage the infrastructure for you. "Quasar Private" is optimized to run under your own Virtual Private Cloud infrastructure.

With its easy scalability, Quasar eliminates long content queues and waiting period for any content volume. This flexibility and instant access, allows you to start scalable QC operations for all your cloud based assets without worrying about any infrastructure hassles.

Quasar Advantages

Multi Support	Cloud	Optimized to process content present on AWS, Azure and Oracle DIVA
Storage Browsing		Ability to browse content on your native cloud storage
REST API		Easy integration with REST API
Dynamic Scalability		Adjust QC capability to perfectly match your content volume with dynamic scalability
Low latency		Automatically select the processing instance in the same region as the content
Fast Provisioning		No installation or hardware provisioning required, start using QC within minutes
Popular Templates		Factory templates for Netflix, ARD-ZDF, iTunes, and DPP
Deployment Flexibility		Based on your business requirements, choose between our ‘SaaS’ or ‘Private’ options.
Payment Flexibility		Volume based pay-per-use plans that align with your business
