

QStudio® is an advanced cloud-based quality control (QC) review system designed to streamline the QC process. The platform provides an intuitive interface where users can review the reported errors directly on the audio-video timeline, and collaborate with other team members, without the need to download the content. This allows a seamless review process, helping users identify and agree on the content decisions such as acceptance, rejection or correction.

Key Features

- ✓ **Review on audio-video timeline** - View & navigate to alerts directly on the content timeline
- ✓ **Audio waveform display** - Visualize the audio issues with audio waveform
- ✓ **Side-by-side video review** - Review the content video against the reference with frame accuracy
- ✓ **Multi-audio review** - Review an audio against a reference audio using comparative waveforms
- ✓ **Alert filter** - Filter the results in order to focus on specific type of alerts for more efficient review
- ✓ **Alert categories** - Assign category such as 'Creative Intent' to alerts for faster content decisions
- ✓ **Annotations** - Visualize with system mark-ups or add your mark-ups for video issues
- ✓ **Custom alerts** - Add custom alerts to consolidate all your QC issues in one project
- ✓ **Review comments** - Collaborate amongst users by adding & viewing comments on specific alerts
- ✓ **QC report export** - Export comprehensive QC report containing comments and categories
- ✓ **EBU QC report** - Generate EBU compliant QC reports for easy integration with external solutions
- ✓ **Multilingual** - Localize the user interface in your language. English & Japanese natively supported

Specifications

QCstudio® works on the proxy file created by Quasar® during the QC process. QCstudio® is hosted in the cloud and can be accessed from a laptop or a workstation.

System requirements:

Browser: Google Chrome (131+), Microsoft Edge (130.0.2849.5+), Mozilla Firefox (132.0.2+)

System resolution: Minimum - FHD (1920x1080)

Display size: Use text size of 100%. Higher text sizes may affect the user interface

Operating System: Windows 10, Windows 11, Linux, macOS

Cloud storage: AWS

CPU: Quad core

High speed Internet connection
